Ashar

Networking and Cloud Engineering student · CCNA coursework complete

ashar-networks.github.io / github.com/Ashar-Networks / AsharNetworks@gmail.com

ashar# SUMMARY

Diploma of Information Technology student (Advanced Networking and Cloud Engineering) who has completed the Cisco CCNA coursework, with two years in a retail technology department advising customers on networking. Looking for a junior network engineer role.

ashar# EDUCATION

Cisco CCNA coursework — Completed · exam not yet taken

Diploma of Information Technology — Jul 2026 – Jul 2027 (expected)
Advanced Networking and Cloud Engineering · ICT50220 · CRICOS 107313E · TAFE

Bachelor of Information Technology — Planned after the diploma
Networks and Cyber Security major · Griffith University, Gold Coast

ashar# SKILLS

Routing and switching: Cisco IOS CLI, VLANs and trunking, inter-VLAN routing, static routing, OSPF, STP, EtherChannel, VLSM subnetting, IPv4 and IPv6

Services and security: DHCP, DNS, NAT, ACLs, port security, Wi-Fi networking, config auditing

Systems and tools: Cisco Packet Tracer, Windows Server, Active Directory, Hyper-V, Ubuntu Linux, Kerberos troubleshooting, journalctl log reading

Planning and support: Customer troubleshooting, solution recommendations, encrypted cloud backup, network segmentation, ICT project planning, business analysis tools

ashar# PROJECTS

Campus switching and routing lab — Cisco Packet Tracer
Three access and two distribution switches serving HR (`VLAN 10`), Sales (`VLAN 20`) and Management (`VLAN 90`), with inter-VLAN routing on a Cisco 1841 using router-on-a-stick. Split 192.168.235.0/24 into four /26 subnets.

Active Directory home lab — Hyper-V, Windows Server, Ubuntu
Windows Server domain running in Hyper-V, with an Ubuntu VM being joined to it. Traced a Kerberos pre-authentication failure back to a password issue and worked through the logs for the remaining error.

Digital records proposal — Case study, TQLD Lawyers
Pitch for a firm of 15 lawyers, 5 administrators and 3 receptionists moving off paper records. Chosen concept: encrypted cloud backup with department-segmented synced folders and client file access.

ashar# EXPERIENCE

Officeworks, Technology department — Part-time · 2 years

- Assessed household and small-business customer needs and recommended technology to match their budget, goals and use case.
- Advised tens of customers on home and small-office networking and NBN plans, sizing solutions by devices, premises size and budget.
- Recommended mesh Wi-Fi for coverage and faster Ethernet cabling for wired speed.
- Troubleshot faults from simple to complex, including NBN connection issues.
